[OVERVIEW](#) [DETAILS](#) [WHAT'S NEW](#) [FEATURES](#) [TECH REQUIREMENTS](#) [RESOURCES](#)

**Accomplish More, Faster**

**Start your work in MindManager**

Gain new perspectives by organizing your work with MindManager. You can step back, see the big picture and then drill into all of the important details.

**Capture ideas, information and more...**

It's easy to capture everything – notes, hyperlinks, attached files, spreadsheets and more. Or, simply import documents and project plans. With everything in a single dynamic view, you'll uncover relationships, draw important connections and reorganize content into clear communications.

**Avoid timely rework**

Once everything is organized in MindManager, with a click you can export content to Microsoft® Word or PowerPoint®, saving something really valuable, your time.

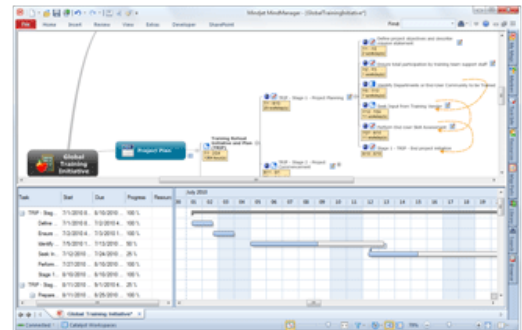

**Ensure Project Success**

**Define, align and engage**

Project success depends on getting things right from the start. Using maps to quickly display and organize input, fosters active participation in project planning and goals setting. Gather requirements, generate new ideas and facilitate collaborative problem-solving via MindManager's visual brainstorming.

**Build accurate project plans**

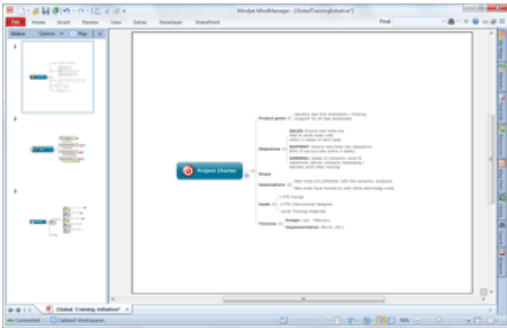

With everyone fully participating, you'll create more realistic plans and schedules by mapping out your tasks, optimizing resource assignments and defining dependencies and timelines. The **new Gantt chart view** lets you see the plan take shape as you define it. Track everything in MindManager, or export your work directly into Microsoft Project.

**Improve project collaboration**

Add Mindjet Catalyst to increase team participation and alignment even more by providing everyone access to up-to-date status and project information in project maps stored in shared workspaces.

**Communicate More Effectively**

### Make meetings and presentations come alive

Conduct your meetings and presentations with MindManager to make the most of everyone's time. Even if you've never used MindManager before, you'll find it surprisingly simple.

Organize and present everything in a visual context to ensure clear understanding and dramatically improve retention.

### Facilitate dynamic meetings

MindManager's easy-to-use interface lets you navigate through your presentation map one step at a time without ever losing context. Jump to any topic with a click of the

mouse and easily respond to questions with all the backup details.

Use the **new Slideshow mode** to have total control of what to present and how you'd like to show it. Either way, MindManager is the most dynamic way to present information and immediately capture feedback in context. Use it to solve problems, brainstorm ideas, capture action items and easily share your results on the web or with interactive PDF files.
